Rusty and Jeff,

I had my monthly call with Sharlene on Friday and she asked me about ORD weighing in on this document.

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Sharlene asked me to participate in her meeting with Hayley tomorrow to discuss – so I wanted to give you both a heads up and make sure we are on the same page with this.

Rusty –

I hadn't seen this document before but it seems like it might be a good idea to share with other CCTers. Have you already shared within the Center? Should I just focus on BCTD?

Subject: REVIEW and COMMENT: Addressing the MAD from Computational Methods within OECD TGs- Towards a Good Computational Methods Practice...due 17 JUNE 2020

Dear EPA Colleagues,

At the recent meeting of the WNT in April, the issue of integration of computational methods and data under the Mutual Acceptance of Data System (MAD) was raised. As you know this was an issue discussed at the Joint Meeting in February and a more structured proposal will be prepared for November at the request of the Joint Meeting.

A draft document has been prepared by the Secretariat for discussion at the Working Party on Hazard Assessment (WPHA) later this month. The document suggests the need to develop guidance on quality assurance for computational methods in general, complementary to the existing GLP principles. Please note that evaluation of individual methods or combination of methods into Test Guidelines remains under the purview of the WNT, as indicated in the document.

The WNT bureau thought that the WNT may want to provide some initial feedback in preparation for the WPHA meeting...other groups (GLP, QSRA TB and WPHA) are also consulted.

The WPHA will meet on 22-24 June via zoom and will have an opportunity to exchange verbally on this document. The Secretariat will collect member countries' written feedback and will be sent before the WPHA meeting, additionally input received will be used in preparing the Joint Meeting document for NOV 2020.

If you have any additional feedback on the document please send me your responses on or before 17 June 2020. I request that you use the attached commenting form.

Thank you,
Wanda

Subject: OECD, Addressing the Mutual Acceptance of Data from Computational Methods within OECD Test Guidelines- Towards a Good Computational Methods Practice

Dear members of the WNT,

At the recent meeting of the WNT in April, the issue of integration of computational methods and data under the Mutual Acceptance of Data System was raised.

As you know this was an issue discussed at the Joint Meeting in February and a more structured proposal will be prepared for November at the request of the Joint Meeting.

A draft document has been prepared by the Secretariat for discussion at the WPHA later this month.

The document suggest the need to develop guidance on quality assurance for computational methods in general, complementary to the existing GLP principles.

Please note that evaluation of individual methods or combination of methods into Test Guidelines remains under the purview of the WNT, as indicated in the document.

The WNT bureau thought that the WNT may want to provide some initial feedback by end of June. Other groups (GLP, QSRA TB and WPHA) are also consulted.

The WPHA will meet on 22-24 June via zoom and will have an opportunity to exchange verbally on this document. I have attached the list of WPHA delegates so that you have a chance to exchange with your counterparts before the meeting. Alternatively, the Secretariat will also collect your written feedback, to be sent before end of June, and use input received in preparing the Joint Meeting document for November.

Best wishes and I hope everyone continues to be well and safe,
Anne
